

Letter from the director

We live in a challenging time. There is a lot of talk about the security of investments and we are all feeling the uncertainty. There are, fortunately, some investments that are more resilient to the vagaries of the market. There are our own quality of life. The return on investing in conservation of New Mexico's outstanding natural and cultural heritage, as well as our clean air and water, will never have value. It will only grow.

The quality of that TRF is better prepared than ever to lead conservation in New Mexico. Our history in 17 years of park building and conservation throughout the state has given us a wealth of experience. None is the more so in New Mexico's big planning in TRF.

With your help this year, TRF will present the Rio Grande river from near Tuba and Las Cruces and spread in public recreation near Albuquerque. As you read the enclosed development of recent and current efforts and look at pictures of these magnificent places, I hope that you recognize your power to preserve them under New Mexico's special and their own set of standards to support the Board of TRF. Always, New Mex.

John Parks
John Parks, Director
New Mexico State Trust

The river spreads on TRF's activities in the New Mexico area, please subscribe to our TRF. You can subscribe by sending a check to:
